- (See measuring instructions overleaf)*

Petlife

flecta™

HIGH VISIBILITY DOG JACKET

The unique benefits of Flecta Hi-Vis jackets

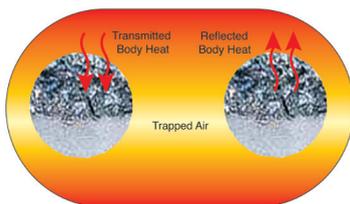

♥ Petlife **flecta Hi-Vis Dog Jackets** are constructed to give maximum visibility day or night. During daylight, the fluorescent yellow can be seen from considerable distances and during darkness any light will be immediately reflected from the reflective stripes on both sides. These features are hugely beneficial to responsible dog owners and also offer personal safety for the owner/walker.

♥ Incorporated between the inner and outer layers of the **flecta Hi-Vis Dog Jacket** is a layer of Flectalon® thermal insulation.

Developed from NASA research into aluminised surfaces, Flectalon® can reflect up to 95% of radiated heat

by using a revolutionary lightweight insulating material specifically designed for its thermal properties.

How it works

♥ A **flecta Hi-Vis Dog Jacket** is water-resistant, so your pet stays warm and dry, but it is still machine washable at 40°C maximum.

♥ With its high visibility, thermal insulation, positive clasps and adjustable straps, your **flecta Hi-Vis Dog Jacket** is the ideal treat for your dog and you.

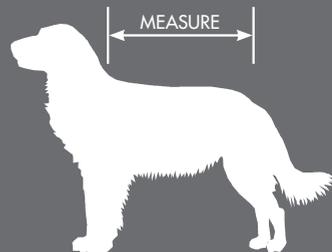

♥ **Made in the UK.**

Important measuring instructions

Petlife **flecta Hi-Vis Dog Jackets** are available in different sizes to suit the variation of size within each individual breed.

To ensure a comfortable fit for your dog, we recommend measuring your dog as shown below. If your dog measures between sizes please choose the smaller size.

Sizes are shown on the barcode label.

Measure from the base of the tail to the collar position

Petlife **flecta Hi-Vis Dog Jackets** are available in the following sizes:

10" / 25cm	22" / 56cm
