Celebrating 25 Years
Petlife

**The No.1
in Pigeon
healthcare
in the UK**

Petlife

harkers

*Trusted by leading
fanciers across the UK
and Europe*

2019 – Issue 2

The UK's leading provider of quality pet bedding, healthcare, and hygiene products

We have been at the forefront of providing pet bedding, healthcare and hygiene products to both professional and domestic pet owners for over twenty years. We pride ourselves on delivering great customer service, coupled with a growing and innovative product range that you - our customer - demand.

Petlife International Ltd was formed in 1993 as a result of a management buyout of Vetbed (Animal Care) and Harkers Ltd from Grampian Pharmaceutical. Since then we have continued to grow our business through the strength of our original brands, and the addition of new and exciting

products, such as KarmaWrap, Hotties, and Oxbow pet products for herbivores.

We are also proud to supply Harkers, the number one brand in pigeon healthcare, with some products also for use with poultry.

Petlife
vetbed[®]
ORIGINAL

A hard-wearing, everyday bed with unique properties suitable for animals at all life stages.

YOUNGER ANIMALS: Keeping them safe and warm, the special drainage properties ensure they stay dry and warm even in the event of an accident.

OLDER ANIMALS: Enjoy a far higher degree of comfort and mobility with constant warmth from the heat retaining properties of the fibres.

RECUMBENT ANIMALS: Vets recommend the product for

- ♥ For all life stages of dogs, cats and house rabbits
- ♥ Suitable for the home, kennels and travelling
- ♥ Excellent drainage properties

Eton Veterinary Clinic: "The Vetbed is the perfect bed for your pet!"

Sandhole Veterinary Centre: "I cannot praise Vetbed enough."

recumbent animals requiring hospitalisation or pre/ post operative care.

BIRTH STAGE: Keeps the mother and baby warm and dry whilst retaining body heat, and reducing the risk of hypothermia. The texture gives comfort and security and encourages mobility in the young by aiding grip.

Vetbed's higher bulk, greater resilience, unique drainage properties and superb heat retention makes it distinct from all other dog beds on the market.

Voted the Best Dog Bed by the readers of Your Dog magazine, it is probably the safest and most effective fabric ever developed for use in the veterinary profession and independent tests have proved conclusively that in spite of it's luxurious feel it has tremendous strength and durability.

- ♥ Hygienic, non-irritant and non-allergenic
- ♥ Machine washable time after time at up to 95° C
- ♥ Keeps pets warm and cosy

Petlife
vetbed[®]
GOLD

Vetbed[®] Gold is a unique veterinary bedding and the first of its kind in the world!

A development of Vetbed[®] Original, Vetbed[®] Gold has all the same benefits of the market leader, plus extra properties that make it particularly beneficial to the veterinary profession and domestic user alike.

The pile of Vetbed[®] Gold is luxuriously thick - even thicker than Vetbed[®] Original. It incorporates Ultra-fresh[®] fibre, which continually releases molecules that work against bacteria and fungi, ensuring a longer, fresher life for the bedding.

Ultra-fresh[®] fibre is a safe, non-toxic integral agent. Over the lifetime of the bedding, it will provide effective control of bacteria, mould, mildew and fungi - often the cause of smells and odours - and help to create a more hygienic environment. In addition, because of its work against bacteria, dead skin (both human and animal) is prevented from decaying. This means that the common dust mite is starved, and consequently dies. This is a tremendous benefit to animals that are house dust mite sensitive, or that generally suffer from skin allergies.

Trevor Turner B. Vet.Med., MRCVS: "After two months I now have a virtually non-itchy dog"

- ♥ Ideal for animals with skin problems or allergies
- ♥ Effective against house dust mites and common bacteria
- ♥ Combat that 'doggie smell!' - bed stays fresh for longer
- ♥ Prevents growth of bacteria, moulds mildew and fungi
- ♥ Strong, long lasting, and easy to care for
- ♥ Unique bedding with deep luxurious pile
- ♥ Machine washable at up to 95°C
- ♥ Hygienic, safe and non-toxic
- ♥ Excellent drainage properties
- ♥ Keeps your pet warm and dry

Petlife

flectabed®

Flectabed® uses a revolutionary lightweight insulating material specifically designed for its thermal properties, developed from NASA research into aluminised surfaces which can reflect up to 95% of radiated heat.

The Flectabed® inner quilt combines two key elements of thermal insulation to keep cats and dogs exceptionally warm all year round. Multi layered fibres trap pockets of warm air to reduce heat loss, and reflective surfaces reflecting any lost body heat back to the pet. The outer fleece cover is strong and moisture passes through it easily, so wet or damp pets are still effectively insulated from chills.

- ♥ Helps with arthritis, helps ill pets recover faster
- ♥ Unique insulating qualities that reflect lost body heat back onto your pet
- ♥ Extra warmth without the need for electricity
- ♥ Innovative technology in thermal bedding for your cat or dog

Petlife Karma Wrap

Gives your dog a calming hug

Important measuring instructions

KarmaWrap is available in different sizes to suit the variation of size within each individual breed.

To ensure correct size for your dog, measure completely around the chest, just behind the front legs.

Petlife's KarmaWrap ... like a hug, is an effective natural chemical-free wrap for calming your dog when troubled with:

- ✓ Noise Anxiety
- ✓ Car, Crate or Travel Anxiety
- ✓ Separation Anxiety
- ✓ Firework or Thunderstorm Anxiety
- ✓ Lead Pulling
- ✓ General Excitability
- ✓ General Nervous Behaviour
- ✓ Continuous or Antisocial Barking

Choose KarmaWrap because ...

- ◆ Lightweight breathable 4 way stretch fabric
- ◆ Simple to fit and easily adjustable
- ◆ Water resistant, antibacterial and machine washable at 40°C
- ◆ Made in Great Britain

KarmaWrap works because...like giving a hug, or swaddling a baby, the constant gentle pressure applied around your dog's chest and torso helps her/him feel safe and secure. With this wonderfully induced sense of security she/he feels calmer and displays amazingly quieter and more relaxed behaviour.

KarmaWrap has been proven to work on 85% of distressed or anxious dogs and with a '100% Money Back Guarantee', if returned within 45 days from proof of purchase you are assured 100% satisfaction.

flecta[®]

3 in 1 DOG JACKETS

The only jacket to be
SEEN in this winter!

The unique benefits of Flecta dog jackets

During darkness, any light sources are immediately reflected back from the reflective stripe on both sides. This feature is hugely beneficial to responsible dog owners and offers personal safety for dog and walker.

Incorporated between the inner and outer layers of fabric is a layer of lightweight Flectalon[®] insulation, originally developed from NASA research into aluminised surfaces. Flectalon[®] can reflect up to 95% of radiated heat – helping to keep pets warm in temperatures as low as minus 5°C.

A Flecta Jacket is shower proof, so pets stay dryer for longer, but is still machine washable at 40°C.

- ♥ High visibility stripes
- ♥ Lightweight Flectalon[®] insulation
- ♥ Shower proof outer fabric
- ♥ Simple to fit with easy adjust buckles
- ♥ Machine washable at 40°C
- ♥ A choice of fluorescent yellow, orange or pink, or navy blue
- ♥ Made in the UK

wipeout

Wipeout Household Flea Spray

Wipeout is manufactured using a patented blend of silicones, which quite literally forms a sticky trap—the adult fleas are permanently rendered immobile and the eggs and pupae are prevented from hatching, completely breaking the life cycle and preventing reinfestation.

- ♥ Pesticide free household flea spray
- ♥ Controls all four stages of the flea life cycle
- ♥ Eliminates airborne allergens by coating the flea in a "sticky trap"
- ♥ No need to remove pets from the treated room or open windows
- ♥ Kills fleas, lice and mites with no resistance
- ♥ Remains active for up to 6 weeks after application
- ♥ Safe for use around children

Animal wellness products with Hypochlorous technology

VETERICYN PLUS LIQUID

Vetericyn Plus® Wound & Skin Care liquid products can be used for cleansing, irrigating, debriding, and moisturizing wounds. Vetericyn Plus sets the stage for optimum healing conditions through all phases of wound healing. In addition, the liquid solution is an excellent choice for moistening wound dressings. It is safe to use around the mouth, nose, ears, and eyes.

VETERICYN PLUS ANTIMICROBIAL HYDROGEL

Vetericyn Plus® Antimicrobial Hydrogel is designed to adhere to the wound site, providing an extra layer of protection or barrier for the wound bed. This unique hydrogel does not cause dermal irritation and is safe for use in sensitive areas or with a wound dressing to keep the wound moist.

VETERICYN PLUS EAR CARE

Vetericyn Plus® Ear Rinse is created with all types of ear shapes in mind. Utilizing a dropper top, this completely safe formula helps alleviate irritation and remove foreign materials, without discomfort to the animal.

VETERICYN PLUS EYE CARE

Vetericyn Plus® Eye Wash is specially formulated and tested for use in and around the eye. Studies prove Vetericyn Plus to be completely safe, helping alleviate irritation and removing foreign dirt and debris, without stinging or discomfort to the animal.

Vetericyn Plus® VF is a next generation wound and skin care management system used for cleansing, irrigating, and debriding wounds, which sets the stage for optimal healing conditions

Vetericyn Plus® products assist in the mechanical removal of cellular debris, necrotic tissue, and foreign material from the skin and wound surface through debridement. Wounds that are clean, well maintained, and moist have demonstrated faster healing outcomes than wounds left on their own.

From dermatology to post-operative care, the Vetericyn Plus® family of products provides an economical tool for a range of veterinary wound and skin care needs. Powered by an advanced hypochlorous technology platform, Vetericyn Plus® provides vets with a portfolio of products made specifically to enhance and streamline wound and skin care protocols for animals.

Petlife

harkers

The No.1 in pigeon healthcare in the UK

Promoting a wide range of care products and supplements for racing pigeons.

John Halstead and Maurice

Maurice, Winner of British Barcelona Club 2011 Palamos race

"It would be true to say that I have used Hormoform for more than 30 years with my pigeons. For me it provides 2 major benefits firstly helping to rear strong, healthy, robust youngsters, and secondly help in the diet of my race birds, particularly in conditioning my long distance widowhood cocks. Hormoform is included in the diet of my breeding pigeons from the day my first youngsters hatch, and continues through to the end of September when the last YB race has been flown and any latebreds have been weaned."

John Halstead

WONDER PIGEON will change the way fanciers look after their pigeons.

A unique and patented feed supplement with astonishing results in coupling, laying, hatching, breeding and racing performances without contra-indications. A combination of fatty acids with a natural antibacterial activity and super recovery qualities.

- ♥ A patented and unique formula to save money and simplify your job every day
- ♥ The one and only product effective against young bird disease if used continuously
- ♥ Prevents and treats intestinal problems
- ♥ Greatly simplifies the approach to pigeon health and recovery
- ♥ One of the cheapest products on the market – can cost as little as 12p per day

METHOD OF ADMINISTRATION

Breeding period:

Daily 2ml Wonder Pigeon per litre of drinking water (with youngsters – brooding period).

Young birds:

Daily 2ml Wonder Pigeon per litre of drinking water.

Racing season:

The day of arrival + the day after: 2ml Wonder Pigeon per litre of drinking water. The day of shipment + the day before: 3ml of Wonder Pigeon per litre of drinking water.

Moulting period:

Daily 2ml of Wonder Pigeon per litre of drinking water.

WONDER PIGEON G.P. (Green Power)

Compared to the standard formula, **Wonder Pigeon GP** not only has an increased and wider range of antibacterial properties, but it helps the pigeon to absorb and digest the proper level of nutrition in order to build super muscles for the racing period. For this specific reason we recommend to use it at 1.5ml per litre of drinking water daily or 2.5ml per kg of food daily, to have a perfect antibacterial effect. If you increase the dosage to 2ml-4ml per litre of drinking water daily or 3ml-5ml per kg of food daily you will see your pigeon easily increase their muscle mass and reduce fat levels. No side effects, no contraindications at all.

WONDER PIGEON PILLS

Wonder Pigeon Pills offer a big source of energy and a boost to the metabolism of the pigeon. The individual treatment allows fanciers to help his pigeons overcome crisis problems connected to everyday activity, such as poor vitality, watery droppings and reduced appetite. Wonder Pigeon Pills are also something unbelievable for the racing season. One pill for each pigeon at basketing time will give them the energy surplus to win prizes more easily.

Petlife

flecta®

A revolutionary insulating material, made from fine reflective fibres

Flectalon® insulation material has been developed by NASA's research into metallised surfaces. Initially produced as a means to keep astronauts warm during missions, the reflective technology has since been recognised as the most efficient way to maintain cold or hot temperatures without the need for electricity or any other thermal aid.

Manufactured in the UK, Flectalon® is an extremely efficient insulation material combining conventional trapped air thermal insulation with multiple mirror finish surfaces to reflect cold or hot temperatures back onto the product contained within.

This technology means that anything surrounded by Flectalon® material can be kept at a low or high temperature for far longer than had previously been possible without any further thermal aid. The material effectively provides a cold or hot store for up to 8 hours - significantly longer than any other insulation material.

We make a variety of products using this fantastic insulating material, including our Hi-Vis Dog Jackets and Flecta® Pet Bedding. Some of our other Flecta® products are listed below:

- ♥ Hot or Cool bags - lightweight, hardwearing, and incredibly effective
- ♥ Fishing Bags - keep your catch cold for up to 8 hours
- ♥ Divers Undersuit - a breathable insulation, bacteria and fungus resistant
- ♥ Stable Rug - extra warmth without the need for electricity
- ♥ Thermal Blanket - creates a guaranteed pocket of warmth
- ♥ Statue Covers - to protect against cold conditions and weathering
- ♥ Hi-Vis Workwear - keeping a workforce warm in the coldest conditions
- ♥ Transporter - commercial method for protecting chilled produce in transit
